Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Status: 1-10 rejected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Elko et al. (US Patent No. 5,537,574).

1. Regarding Claims 1, and 6, Elko discloses a file device that records a file to storage means divided among a plurality of blocks, comprising:

block allocation means for allocating blocks to record the file in the storage means (see Fig. 1, CPC-1, CPC-M, column 5, lines 43-47, Elko);

management information production means for producing management information designating blocks allocated by the block allocation means (see Fig. 1, DASD Director, column 5, lines 48-53, Elko); and

storage control means for recording the files in the storage means after recording the management information produced by the management information production means in the storage means (see Fig. 1, 101, column 5, lines 61-65, Elko).

2. Regarding Claims 2, and 7, Elko discloses a file device, wherein the storage control means attaches information indicating a preceding block and information indicating a size of data to be recorded in a block to the data recorded in the block and records to the storage means (see column 16, lines 40-48, Elko).

3. Regarding Claims 3, and 8, Elko discloses a file device, wherein the storage control means updates the management information so that, when a data-unrecorded block occurs among the blocks allocated by the block allocation means when recording the file, the unrecorded block becomes an unused block (see column 17, lines 2-8, Elko¹).

4. Regarding Claims 4, and 9, Elko discloses a file device, wherein the storage control means has storage sequence setting means for setting a storage sequence of data that makes up the file, the data that makes up the file being allocated among blocks to be recorded by the block allocation means based on the sequence set by the storage sequence setting means and recorded to the allocated blocks (see Fig. 32, 3201, column 51, lines 14-19, Elko).

5. Regarding Claims 5, and 10, Elko discloses a file device, having file readout means, such that when information indicating the preceding block does not indicate the preceding block as a result of the block being accessed in sequence depending on the management information, the file being read out, and data being read out from the block, or when information indicating the size of the data recorded in the block is outside the actual block size range, the file readout means halts readout of the file and updates the management information so that subsequent

¹ The process of submitting the "cache miss" which indicates the data does not reside in the cache reads on unrecorded block which indicates the block "unused".

blocks become unused blocks (see column 51, lines 20-38, Elko²).
